PL190µ Introduction to the Go Programming Language

Mission 1: Go Hello World

This assessment evaluates the following competencies:

- *GP001 – Correctly use the syntax of Go programming* *(+1)*
- *GP101 – Write, compile and execute a single source file Go program with the command line (+1)*

In this mission, you have to install Go on your computer and write your very own variant of the Hello World program. To succeed the mission, you have to:

1. Install Go on your computer.

2. Write your own variant of the Hello World program, compile it and run it.

3. Explain to the teacher how you compiled and run your program and how it is working.
